OHSAS 18001, ISO 9001:2008 & ISO 14001:2004 Certified Company

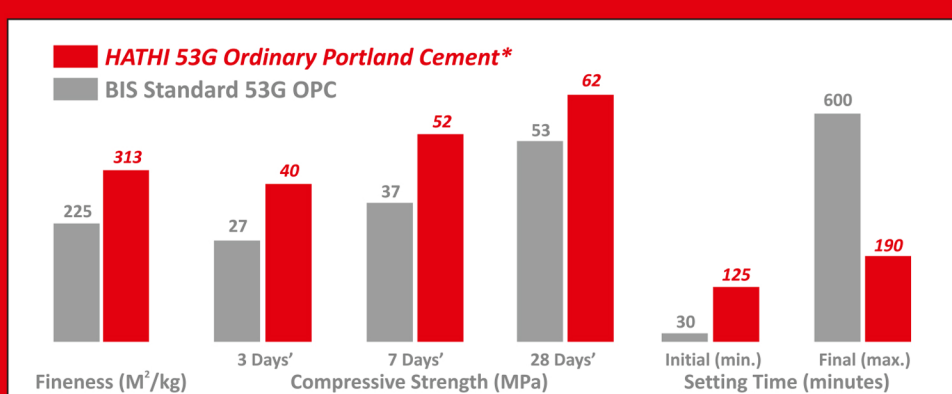

53G Ordinary Portland Cement

For Strength and Durability

HATHI-Chemistry Advantages

- ★ **Low Heat of Hydration(HOH):** C_3S and C_2S scientifically balanced to control HOH. It allows structure to gain strength with time ensuring sound durability. HATHI has low heat of hydration resulting in less consumption of water both during construction and curing.
- ★ **Low Magnesia Cement:** Magnesia causes expansion beyond 28 days of setting. Effect is visible in the form of cracks only after 8-12 months of work. HATHI has low Magnesia (<0.85%) making it crack resistant cement.
- ★ **Low Alkali & Chlorides:** Alkali cause expansion & permit moisture ingress, causing corrosion of reinforcement. HATHI has low alkali content (<0.5%) ensuring long-term protection to structure.
- ★ **Moderate Sulphate Resistance:** Low C_3A resists sulphate attack. By nature HATHI is Moderate Sulphate Resisting cement... extra beneficial especially in the sulphurous soils, highly corrosive waste disposal civil works and humid coastal belt constructions. It is very useful for sub-soil construction (foundation).
- ★ **Superior Reserves:** Our captive mines hosts the best quality limestone-with minimal impurities ensures fault free durable construction.

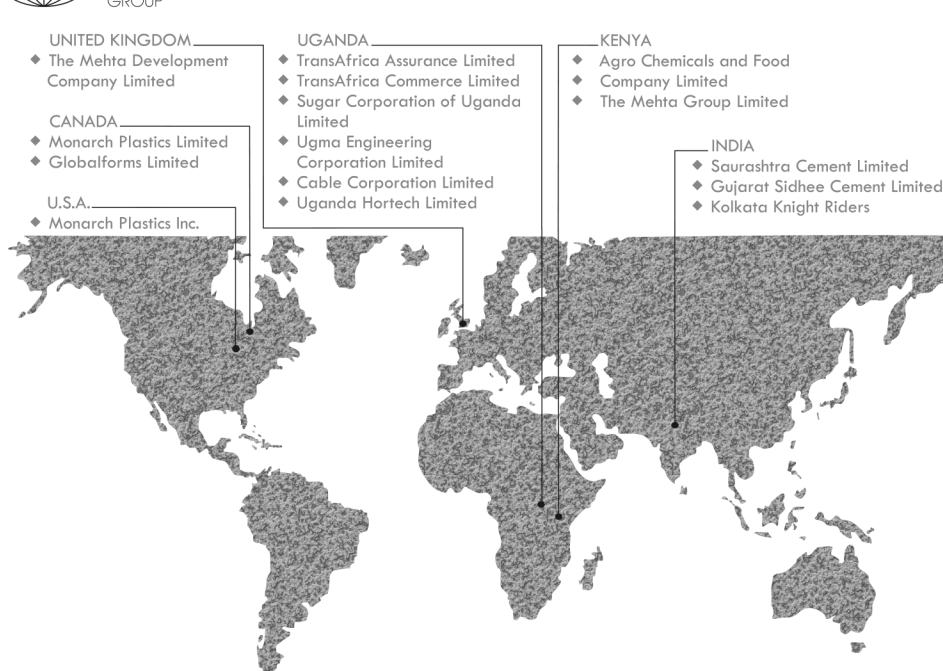

* Above values are indicative monthly average.

Applications-

- ✓ For all structural use like slabs, beams and columns.
- ✓ Residential, commercial, industrial complexes, multi-storeyed buildings, silos, chimneys, bridge-girders, etc.
- ✓ Overhead & underground water tanks, water retaining structures.
- ✓ Concrete roads, runways, bridges, flyovers, culverts, etc.
- ✓ Other applications as tiles, grills, concrete sleepers, etc.

Reaching out to the world

The Mehta Group founded by Rajratna Shri Nanji Kalidas Mehta in 1900, today have sprung with controls assets in excess of US \$400 million worldwide. It is a multinational, multi-activity enterprise with a global presence spanning 4 continents- Asia, Europe, North America and Africa.

The Indian arm of the group comprise Saurashtra Cement Limited, marketing clinker and cement under the brand name of 'Hathi', have won prestigious National Awards in the Indian cement industry and accredited with OHSAS 18001, ISO 9001:2008 and ISO 14001:2004. The products conform to BIS, BS, SLSS and SABS standards and are marketed / distributed in bags, jumbo bags and loose by road, rail and sea - to suit customers' requirements located in Gujarat, Maharashtra, Rajasthan, Madhya Pradesh and the West Coast of India. The company is a recognised Export House with access to overseas markets in Africa, the Indian Ocean and Middle East countries.
